

ASSOC. PROF. DR. TRAN LE LUU

Department of Water Technology, Reuse and Management

Vietnamese German University, Vietnam

Advanced oxidation processes, Electrochemical water treatment, Absorbents, Membrane bioreactor, Biological wastewater treatment, Desalination, Capacitive Deionization, Water reuse, Environmental monitoring, Sensor technology

His main research interests are water and wastewater treatment technology, advanced oxidation processes (O₃/H₂O₂, fenton, persulfate...), electrochemical water treatment (electrooxidation, electrocoagulation, electroreduction), biological treatment, membrane technology, capacitive deionization, environmental monitoring and sensor technology. He has published nearly 40 papers in peer review journals in the field of environmental technology and monitoring.
